

2017 AIA San Fernando Valley Design Awards CALL FOR ENTRIES

Purpose

The AIA San Fernando Valley Design Awards program is designed to encourage and recognize distinguished architectural achievement; to honor the architectural team, their clients and consultants who work together to improve the built environment; to demonstrate the breadth of services architects provide; and to celebrate and raise public consciousness of the architect's role in shaping the quality of life through design excellence.

Eligibility

Participation is open to built and unbuilt projects completed after January 1, 2012 and not having been previously awarded by AIA San Fernando Valley, except that projects that were previously awarded in an unbuilt category may be resubmitted in a built category. Entries must be submitted by the Firm of Record or the Architect of Record. The submitting architect should credit all other participants who substantially contributed to the design of the project. There is no limit to the number of projects that may be entered by a firm. All materials submitted must be cleared for public reproduction. All entrants must be AIA members in good standing as of September 1, 2017.

- Members of AIA San Fernando Valley (architects and associates) who are a principal member of the design team or a principal of the firm responsible for the project; no geographic restrictions apply to primary members.
- Members of other AIA chapters (architects and associates) who are a principal member of the design team or a principal of the firm responsible for the project *AND* the project is located within the geographic boundaries of the San Fernando Valley chapter (County and City of Los Angeles north of Mulholland Drive, the city of Burbank, and the City of Glendale.)

Judging

Decisions by the jury are final. Winning entries are confidential until announced publicly at the AIASFV Design Awards event. Judging criteria include, but are not limited to, the following:

- Design Resolution: Does the project demonstrate skill and sensitivity to formal, functional and technical requirements?
- Sustainable Design: Does the project make intelligent use of available resources?
- Overall Design Excellence: quality of the built form relative to its program, needs, challenges, and setting. Clarity of the parti. Does it further our understanding of design via new approaches?
